

## Drive Your Focus on Health Outcomes

*Designed for health professionals as an affordable population health management tool that powers the collection, reporting, measurement and evaluation of your data and results.*

### Who Benefits:

- Frontline Providers
- School Health Centers
- Operations Directors
- Mental Health Providers
- Data Managers
- Federally Qualified Health Centers (FQHCs)
- Funders/Payers
- ACA Compliance Managers

### Health Professionals Have the Power to:

- ✓ Access accurate, secure, real-time data
- ✓ Track individual patient records
- ✓ Access de-identified aggregate reports instantly
- ✓ Customize reports and forms to meet your specific health and business needs
- ✓ Easily identify patients in need of regular and specialized screening
- ✓ Monitor patients by key risk factors (e.g. hypertension, asthma, diabetes and more)
- ✓ Evaluate the overall quality of health-care provided to patients
- ✓ Integrate true and coordinated care
- ✓ Use health case notes and lab results to inform follow up treatment and support

### Flexible, Customizable, Affordable and Easy to Use:

*Select the version that suits your needs:*

- 1) As an Independent Data Collection System
- 2) As an EHR Companion System
- 3) As an EHR Hybrid System that integrates with your existing data systems

*Now you can integrate existing databases simply and cost-effectively. ethosRx provides an instant snapshot of patient issues in real time, allowing faster response to understand and address treatment plans and better serve patient needs.*

### HIPAA Compliant and Cloud-Based for Broad Access

Access your patient data from any computer, mobile or hand-held device connected to the Internet. Realize the benefits of having multiple practitioners and staff accessing the system simultaneously whether inputting data or pulling reports.

### Gives You Real Time Information

Imagine having the most current patient information at your fingertips — from patient demographics, health history, progress notes — to billing.

### Show Your Success

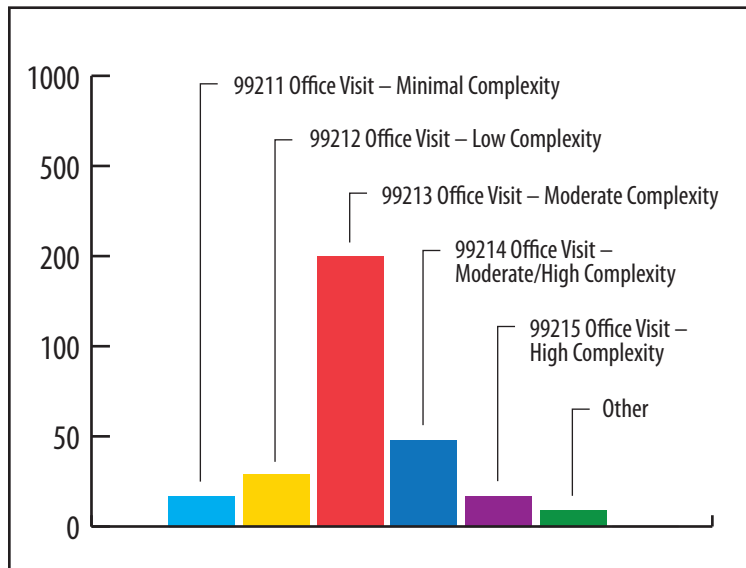

Feel confident that you can easily provide reports that reflect your work and the important patient outcomes you deliver. In today's economic climate, your capacity to report, track and monitor your outcomes to grant funders, payers, health partners and internal management are crucial. Reporting results will increase your ability to diversify funding streams and differentiate your organization to stakeholders.
